Multi Residential Development Lighting

Ettaro Apartments Brunswick East, VIC

*Continually improving
your lighting experience*

Opportunity

Ettaro is Italian for hectare, the size of this state-of-the-art property development. Ettaro offers spacious one, two and three bedroom luxury apartments and beautifully shared amenities in one of Melbourne's most sought-after locations, Brunswick East.

Aglo Systems worked with both Caydon Property Group and Acton Electrical after winning the electrical works and lighting supply tender due to competitive pricing and previously successful projects working with these companies.

Solution

The LED fittings Aglo supplied were specified throughout the residential and common areas of the development. These included downlights and oyster lighting for the apartments; recessed spotlights for the entrance foyer; and downlights for the corridors and swimming pool/gymnasium area.

Over 600 wall lights were required for the balcony lighting in the apartment complex. Due to the large quantity, Aglo's Custom Manufacture and Design department were able to design and fabricate a unique, cost effective cube shaped light to the exact requirements of the client.

The LED light fittings complemented the modern and timeless design details throughout the prestigious apartment building. Aglo delivered all of the light fittings in stages to suit our customer's needs.
