

CUSTOM  
DESIGN AND  
MANUFACTURE

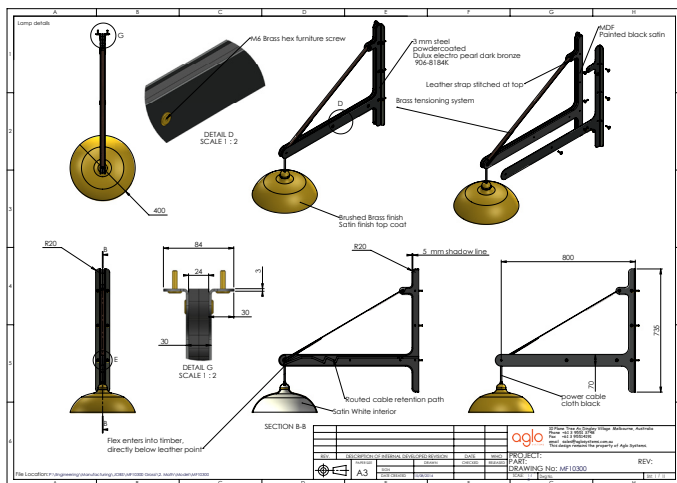

## Dining Room Pendant

Grossi Florentino Grill Bourke St, Melbourne

*Continually improving  
your lighting experience*

## Concept

The beautiful custom wall lights featured in Grossi Florentino Grill were designed by Mills Gorman Architects and engineered and manufactured by Aglo Systems.

This project was completed in less than 4 weeks from start to finish.

Images: Tony Mott Photography

“Aglo Systems incorporated CNC routed and painted MDF, folded and powder coated steel and a brass shade with powder coated interior. Custom stitched leather straps, brass furniture screws with threaded wall inserts and gold capped LED bulb all worked to achieve the stylish outcome. When you are refurbishing one of Melbourne's top restaurants, “the Grill” at Florentino, you need to be working with people who know what they are doing, especially when budgets and timings are key issues. From the initial concept stage, Aglo Systems worked closely with us to establish realistic budgets and time lines. Via a series of design and value management workshops, they developed our fitting and delivered six unique and beautiful fittings on time and on budget. Working with Aglo was an enjoyable and smooth process. MGA will be working with them on future projects.”
