Retail LED Lighting

Jay Jays roll out

Aglo Systems has fit out over 30 Jay Jays stores Australia wide with premium LED light fittings.

*Continually improving
your lighting experience*

Opportunity

Jay Jays is an Australian apparel chain store that was founded in 1993, and is owned and operated by the Just Group.

Aglo Systems have supplied premium LED light fittings for Just Group's retail stores for over two years. More than 50 stores across the Just Group brands have been with Aglo lighting designs and product to date. This site at Eastland Shopping Centre is one of over 30 Jay Jays stores completed during this time.

Solution

Aglo provided a lighting design that ensured all areas were brightly and evenly illuminated while meeting Just Group's lux level criteria and Building Code of Australia wattage per area guidelines. The window display meets the required 2200lx and rear walls bays are 2400lx. The fittings are a warm 3500K colour temperature and high CRI 90 for excellent colour rendering.

The site's interior design concept focuses on a rectangular dropped ceiling feature running the length of the store. For this concept black power track was used with Aglo's spotlight fittings Wally and Cast. Using Wally rectangular spotlights avoids scalloping along the wall bays and provides even illumination from ceiling to floor. A row of Zenith downlights in 4400lm were placed through the centre of the ceiling for general lighting.

For the changerooms, the lighting design concept specified vintage-industrial looking gold cage pendants. Aglo sourced and supplied these fittings specifically for Jay Jays store roll outs. Polar downlights were used for the general changeroom area and LED strip was installed around the change room mirrors so that the light shines directly onto the customers front and avoids unappealing shadows.

Aglo also supplied Sirius LED battens for the back of house area and the illuminated emergency signage.
