LED Lighting Supply

Longbeach RSL Chelsea, VIC

Aglo Systems supply custom made LED light fittings to newly renovated RSL

*Continually improving
your lighting experience*

Opportunity

Longbeach RSL offers dining, gaming facilities and sporting clubs located in the suburb of Chelsea, Victoria. This RSL recently underwent a complete redevelopment of the venue with modern design. The electrical contractor, ADJ Electrical called on Aglo Systems to supply the general lighting for this venue, based on previous success on joint projects and Aglo's competitively priced products.

Solution

The specification for the downlight required a deep baffle, anodised aluminium trim with low glare. We developed and manufactured a fitting with these exact specifications to use on this project. It was supplied in high CRI 90 and a warm colour temperature of 3000K. Aglo provided LED strip which was placed along the RSL's avenue of honour, as well as inside the gaming bar cabinetry. Hubble wall washers was also used to illuminate the remembrance wall.
