Architectural Pendant Lights

San Antone by Bludso's BBQ Crown Casino, Melbourne

*Continually improving
your lighting experience*

Opportunity

San Antone by Bludso's BBQ is a casual dining eatery at the Crown Casino complex in Melbourne.

Aglo Systems collaborated with Techne Architects, Point of View and Crown to create custom designed light pendants for the 187-seat restaurant.

Solution

The pendants are a great addition to the Texas style eatery, complementing the space without being a dominant feature.

The complex luminaires went through a comprehensive process of prototype revisions before the final design approval. The custom team were required to engineer innovative solutions for sheet metal manufacture to achieve the design intent.

The textured copper finish on the trough pendants was another challenge, as the team needed to match the finish with existing pendants in the restaurant – the end result was impressive and matched beautifully.
