

Feature Lighting

Western Porte Cochere Crown Casino Melbourne, VIC

Initial concept drawings

Adorning the Clarendon Street entrance to Crown Casino is the Western Porte Cochere. Designed by Bates Smart Architects and engineered and manufactured by Aglo Systems, these light fittings needed to be partially recessed into the ceiling but still emit a bold, stark presence.

The final design was a combination flame polished acrylic, LED chain and glass crystals within a complicated forming, making the finished design sparkle like a diamond.
