

Capabilities & Services

About Us

Aglo is an Australian-owned lighting supplier, providing lighting solutions for the commercial and retail industries, bespoke luminaires and architectural features, and end-to-end project management services. Since 2004, we have grown to become a leading supplier of commercial and project lighting.

Our vision is to “continually improve our customers’ lighting experience,” through an optimal lighting design, high quality products and personalised service. We see our clients as our partner, and we work with them across all areas of the project development from sourcing, sampling, approval process, to purchasing, delivery and installation, and after project handover.

Our Services

Bringing your unique concepts into reality

Commercial Lighting Supply

As commercial lighting solution experts, our team can assist you with any project whether it be small and complex or large and dynamic, there is no limit to our capabilities.

Custom Lighting Solutions

We design and manufacture bespoke light fittings for large-scale developments, including shopping centres, casinos, hotels, luxury residences, and public spaces.

Lighting Design

Our lighting design team create lighting concepts and solutions to achieve an exceptional lighting experience which is both energy efficient and compliant.

Lighting Efficiency Upgrades

Our Energy Efficient Lighting Upgrades team has a solid record working with many high-profile customers throughout Australia and achieves outstanding results.

Project Management

High-quality, expertly delivered lighting packages aligned to design and specification, delivered with precision, efficiency, and expert project management.

Photometrics Lab

The LabSpion Goniophotometer is a key investment initiative to ensure lights and products supplied are all correctly specified to their designed light output beam angle and light quality colour rendering index (CRI).

Certified Casambi Commissioning Partner

As one of Australia's certified Casambi commissioning partners, we possess extensive expertise in commissioning Casambi smart lighting systems.

Bespoke Architectural Features

We create unique and complex architectural features, such as decorative wall screens, door handles and shades.shine.

Our vision is to "continually improve your lighting experience," through an optimal lighting design, high-quality products, and personalised service.

Project Lighting

Trusted lighting specialists with a strong national presence.

Aglo delivers large-scale lighting solutions across offices, multi-residential developments, education, hospitality, hotels, healthcare, and aged care environments.

With extensive industry experience, we source, manage, and supply high-performing lighting products tailored to each project, balancing quality, innovation, and value at every stage.

- Lighting packages tailored to project budgets
- In-house research and development with rigorous quality assurance
- Access to a global supplier network
- Local assembly in Australia for reduced lead times and competitive pricing

Architecture shapes more than form. It defines atmosphere. Lighting is key to elevating design and creating a sense of drama.

Retail Lighting

Aglo has a proven track record partnering with leading retailers, supermarkets, shopfitters, architects, designers, builders, and electrical contractors.

As retail lighting specialists, we understand the unique demands of illuminating window displays, point-of-sale elements, shelving, counters, gondolas, and fitting rooms. We provide a seamless, end-to-end service, from lighting design planning and specification through to delivery.

- Lighting packages tailored to project budgets
- In-house research and development with rigorous quality assurance
- Access to a global supplier network
- Local assembly in Australia for reduced lead times and competitive pricing

Lighting Design

A well-lit site can make a vast impact on the overall user experience. It is not just about visual comfort but also how each area can be enhanced by lighting, to make it inspiring, emotive, or engaging.

Well-planned lighting drives sales and improves OH&S. We can provide out of-the-box concepts to achieve desired outcomes: from an even and balanced illumination across the site to using lighting for emphasis and decoration. We aim for optimum illumination for the lowest power consumption that meets the design brief and regulations.

Our highly experienced lighting designers, understand the process of developing lighting that provides the right level of light for both comfort and visual appeal. Creating the right lighting effects for your space to perfectly highlight interior elements and generate the best results for your project.

We take into account the structure of the building and its key features, along with Australian standard requirements and WELL/Greenstar standards.

3D renders and Pseudo colour renders help evaluate rendered spaces, giving an idea of the lighting distribution within the space. This is done by graduating them on an illuminance scale and representing them in different colours or grey tones, where white/red is the highest.

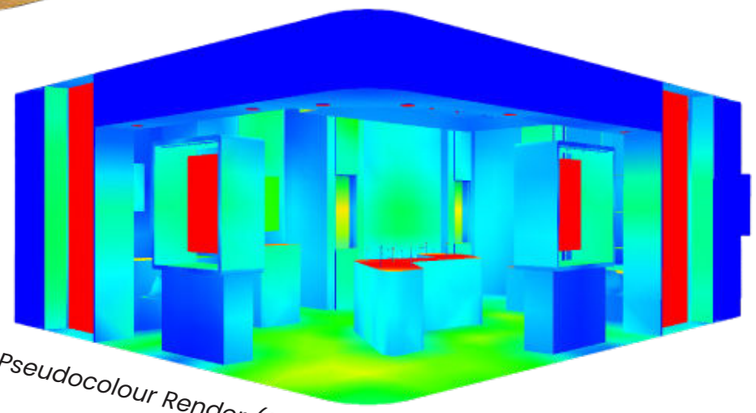

Services Covered:

- Lighting consultation
- Lighting design concepts & plans
- Luminaire specification
- Australian Standards & BCA compliance
- Luminaire aiming & angling service

Photometrics Lab

Luminaire testing and photometric data are often a core element of project submission, with photometric data demonstrating compliance being a key step in the approval and value-engineering process.

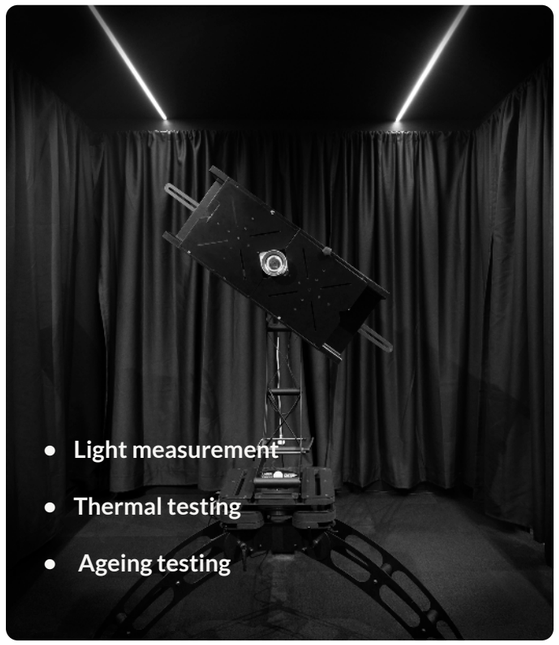

Aglo's Photometric Lab can measure virtually any type of lighting fixture quickly and easily to reduce delay and minimise dependence on external testing.

The LabSpion Goniophotometer is a key investment initiative to ensure lights and products supplied are all correctly specified to their designed light output beam and light quality colour rendering index (CRI). Incorrectly specified and manufactured lights are a resource waste, so too is not using the correct number of luminaires.

Aglo's environmental policy is to use fewer lights, correctly specified and QA tested. In the Aglo Photometrics lab, quality assurance (QA) includes conducting thermal and ageing tests to ensure consistent beam shape, colour intensity, and overall quality.

The LabSpion measures a luminaire's full 3D distribution field and provides a comprehensive fitting report. The files are uploaded in real time to a secure, cloud-based server and tracked, where data cannot be modified. This ensures measurement integrity for clients.

Custom Design & Manufacture

A trusted and experienced partner for your custom design and manufacturing needs.

Lighting plays a pivotal role in setting the mood, enhancing ambiance, and creating memorable experiences. Custom lighting solutions offer the opportunity for personalisation, enabling you to shape the atmosphere of your space according to your preferences. Whether you're an architect, interior designer or business owner, custom lighting allows you to infuse your unique personality into every nook and cranny.

Our portfolio of clientele ranges from boutique hospitality, apartment projects and exclusive resorts, to 6-star hotels and casinos. Our diverse local and global suppliers' network enables Aglo to deliver projects on any scale or budget.

Why Choose Aglo?

Detailed Shop Drawings

Aglo provides detailed shop drawings that ensure you have a clear understanding of what we'll be creating for you.

Innovative Problem Solvers

We help to resolve your idea into a manufacturable product that takes into consideration building weight limitations, budget constraints, installation limitations, etc.

Comprehensive Quotes

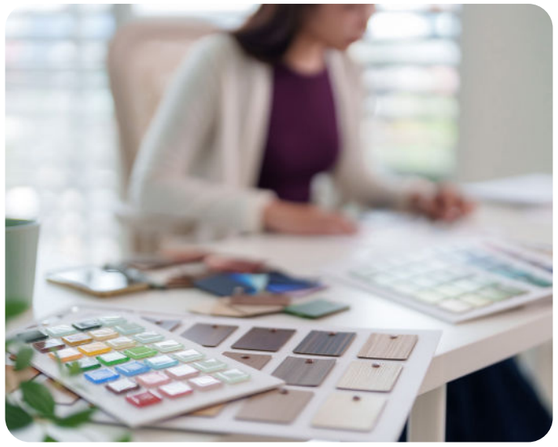

Others can quote with little information then charge variations to achieve what should have been delivered originally. We provide detailed quotes that address all costs required to maintain the designer's integrity and design intent.

Services Covered:

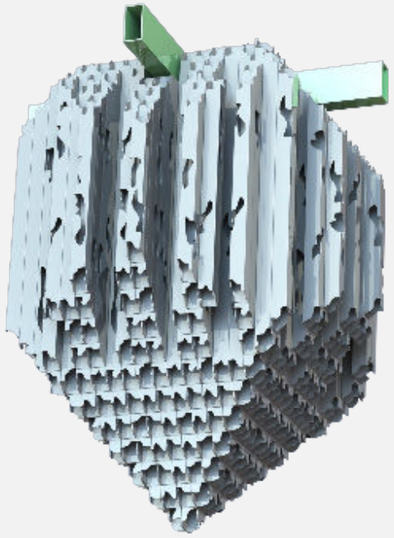

- Project management
- Concept development
- 3D CAD modelling design
- Photorealistic renders
- Prototyping
- Manufacture

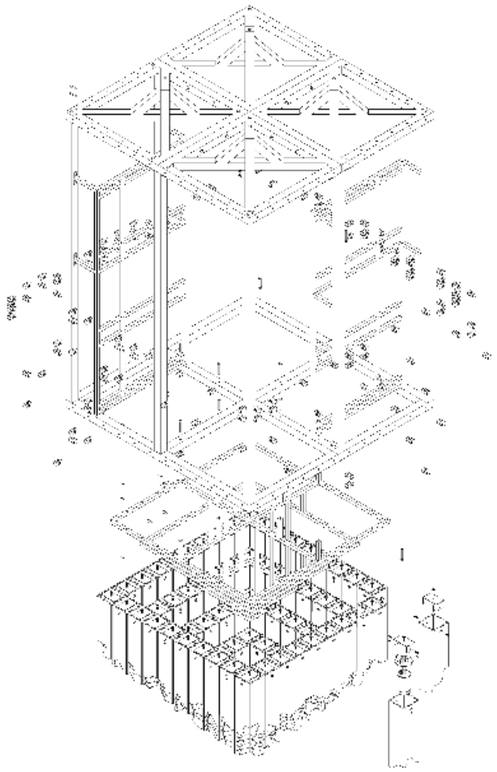

Our Design Process

1. Client Concept & Quote

2. 3D CAD Design

3. Shop Drawings

4. Production

5. Final Product

As one of Australia's certified Casambi commissioning partners, we possess extensive expertise in commissioning Casambi smart lighting systems.

We will support you to help choose, install, and commission a customised mix of the latest Casambi smart lighting products to create the required functionality and best atmosphere for your design and space.

Services we provide

Consulting

If you're looking to integrate wireless control into your next project we can assist you every step of the way – from brief to ongoing technical support we'll work with you to deliver the best result for your project.

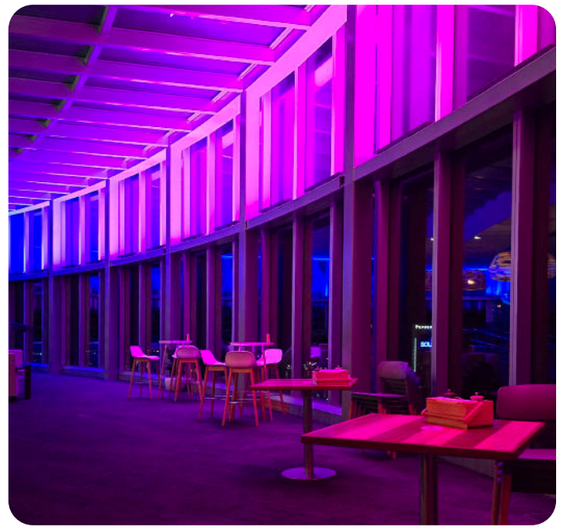

Supply and Integration

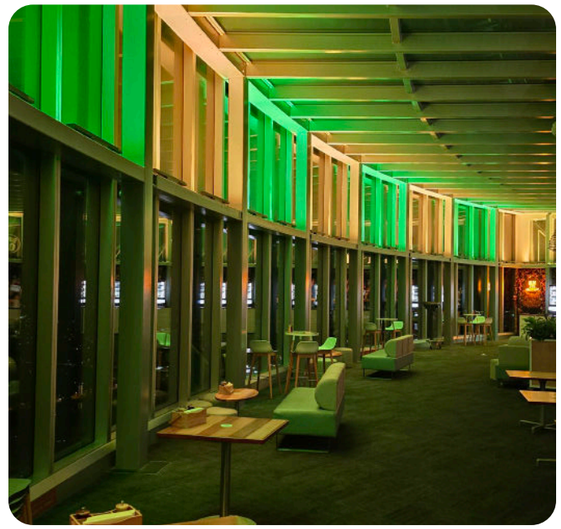

Our team can advise you about the latest Casambi products and technology whilst also completing the supply, setup and integration. We'll help to design your Casambi integration plan and will commission the entire ecosystem of Casambi products for you.

Training

Training is provided for all team members to ensure that your new smart lighting system is used to its fullest potential. We offer both one-on-one training and group demonstrations.

Sustainability

Aglo embraces a holistic definition of sustainability, with four key objectives: people, planet, energy, and economic.

People

We uphold ethical practices for the benefit of our employees, customers, and supply chain.

Planet

We prioritise energy efficiency and Green Star Design & As Built.

Energy

Our manufacturing facility is powered by 100% sustainable energy generated from solar power.

Economic

We manufacture highquality products and provide economic advantages for our customers.

Our aim is to deliver outstanding environmental and social outcomes while maintaining strong commercial performance. We are committed to continuously enhancing your lighting experience, while contributing to a more sustainable future.

Through our four sustainability pillars, we drive ongoing progress and accountabilitycreating meaningful, transformational change within our business and across our entire value chain, from upstream to downstream practices.

Our Current Sustainability Initiatives:

- Powered by solar energy: Our 3000sqm Melbourne manufacturing facility and electric car fleet is powered by 100% sustainable energy generated by a grid of 200 solar panels on our roof.
- Enhancing waste management policies to ensure comprehensive recycling practices, including the use of 100% recycled paper products and partnering with a supply chain supplier that donates 50% of their profits towards clean sanitation development.
- Implementing standardised warehouse practices to minimise paper use, utilise recycled materials for packaging, and replace soft plastic packaging with recycled cardboard sourced internally
- Our Modern Slavery Policy ensures that our business and entire supply chain adhere to human rights and is against child and forced labour.
- Supporting the Overseas Qualified Professional Program, facilitating the integration of skilled migrant professionals into Australian workplace culture.
- We use recycled and recyclable packing materials, paper tape, and have replaced all soft plastic packaging with cardboard recycled from within our premises.
- We assemble a large component of our products locally, reducing the scale and frequency of international shipments, employing local people, and diversifying our product range. Our products are designed with maximum efficiency in mind (more light: less power),with longer lamp life.
- We have developed the Mondolux High Efficacy Series which reduces energy consumption and costs, and features advanced technology and state-of-the-art engineering, providing unrivalled efficiency, longevity and versatility.
- Our lighting design initiatives encompass adherence to The Australian Building Code – Section J6 to ensure our design comply with energy usage requirements. We consistently work with architects and external lighting designers to commit to the Green Building Council of Australia's Green Star ratings, and we regularly review our policies and procedures to keep with the latest regulations in this sector.
- **Declare & Red List Free Labels:** Our Mondolux Hartley HE spotlight was one of the pioneering lighting products in the AU/NZ region to receive a Declare Label from the International Living Future Institute. Mondolux Power Track is the first product in our range to receive a Red List Free Declare Label.
- **IES - The Lighting Society**: The IES is committed to the art and science of lighting, and the education of lighting professionals.As members we are committed to keeping up-to-date with standards and BCA codes.

Our Brands

Mondolux is an innovative lighting brand developed by Aglo with a strong reputation for quality and technical performance. Through decades of combined work in the lighting industry, we understand the needs of the market and identified a gap in the current offering of lighting companies.

We know the challenges in specifying high-performance LED luminaires and have developed a comprehensive product range specifically suited to commercial and project applications. All products are thoroughly tested, warranted and certified to meet Australian, New Zealand and European compliance standards.

The Mondolux website features extensive technical information for ease of access, including downloadable resources, a product configurator and an illuminance calculator to make sourcing the perfect lighting solution simple.

We continue to invest in research and development, to ensure our products are best in market and include the latest in technological advancements.

MONDOLUX™

GLOBAL LIGHTING ALLIANCE

Aligned lighting solutions without borders.

Together, the Global Lighting Alliance delivers retail lighting solutions shaped by decades of experience across key international markets in Europe, North America, and Asia-Pacific.

By combining global reach with local expertise, technical performance, and design-led thinking, we partner with retailers to deliver consistency, quality, and efficiency worldwide.

aglo™

Australia & Asia-Pacific

20+ years delivering high-performance retail lighting, including in-house design and custom manufacturing for tailored project solutions.

LUMIPARTS

Europe & UK

Backed by 35+ years in retail lighting and a 2,500m² warehouse near Amsterdam holding local stock, Lumiparts delivers lighting solutions with fast, dependable fulfilment across Europe and the UK.

SPECIALTY LIGHTING GROUP

United States & Canada

With 30+ years delivering innovative retail lighting solutions, SLG provides dedicated project management, local stock availability, reduced lead times, and consistent on-time delivery.

Simplifying Global Retail Lighting

Brand Consistency

Unified lighting design creates a familiar, cohesive store feel worldwide.

Streamlined Rollouts

Regional support makes store openings and refurbishments faster and easier.

Dedicated Team

A dedicated Account Manger provides clear communication and smooth coordination.

Fixed Pricing

Agreed pricing periods support predictable budgeting with no surprises.

Extended Warranty

All products include extended warranty for confidence and fast issue resolution.

Reliable Quality

One global solution ensures consistent product quality and low long-term maintenance.
